

Create a luscious vertical garden with this easy to install vertical garden kit. Suitable for use with regular potting mix, the removable trays accommodate different planting densities so maintenance and design changes are simple.

Each tray is fitted with an anti lift arm to keep them safely positioned as well as a water reservoir designed for the provision of a capillary wick to re-use stored water and facilitate sustained plant growth. The VersiWall is manufactured from UV-stabilised recycled polypropylene that meets requirements for international "Green Building" certification.

Using the mounting frame means less bolts are required and installation can be carried out easily and safely by just one person.

Kit includes:

- 1 x mounting panel (Overall size (mm) 418w x 925h x 220d)
- 12 x planting trays (Overall size each (mm) 195w x 207h x 192d)
